

INTELLIFINDERID

FIND YOUR GOAL – EASY AND SECURE

INTELLIGENT LOCATION OF INSTALLATIONS

IntelliFinder ID is developed by DIO Systems, a company developing intelligent solutions in order to optimize and improve day-to-day work tasks.

IntelliFinder ID is a unique product, allowing technical installations to be located fast, easily and efficient. The system records, documents and optimizes the day-to-day operations, and presents the information in an uncomplicated and fast manner.

One of the greatest advantages in using IntelliFinder ID is the flexibility of the system, which, through the adaptability of the product, spans across different branches of work. IntelliFinder ID can be used by, among others, municipalities, Supply companies, fibre and broadband, airports, train and metro operators, military, museums and for environmental research – all of these and many other areas of work can be optimized and improved by IntelliFinder ID.

1. DATA TAG

3. FINDER

2. PDA + SOFTWARE

4. WEB SERVER

OTHER ADVANTAGES

OPTIMIZATION

- Fast and precise location of installations, as no need for additional use of GPS or surveyors.
- Provides value to the end-user – IntelliFinder ID enables the company to, faster and more efficiently, provide the customers service.
- Quick and easy to implement

COST-REDUCTION

- Cost-reductions through optimization.
- Reduces cost through fewer faulty excavations, fewer materials, optimization of routines and better documentation of effect.

- IntelliFinder ID is a versatile and flexible product, which can be used for all kinds of installations – you need only one system!

DOCUMENTATION

- Can be used for service and maintenance – creates documentation showing that you were present on site and that the task has been completed.
- Documentation collected in one unified system – not collected in the minds of different employees.
- Intuitive and user-friendly.
